

## kineros-watershed delineation

Posted by Lauriane - 2008/05/07 10:31

---

i gonna use Kineros and i am looking for an algorithm which could delineate my watershed in many subcatchments. could you help me to find this kind of algorithm?

I'm not quite sure what you are asking. AGWA delineates the watershed and also breaks it into subcatchments, then parameterizes the watershed, writes the precipitation and input files, and runs KINEROS. If you're looking for a tool that does that, AGWA is it.
